Consulting

- ❖ Transcriptomics: Bulk, single cell, small RNA
- ❖ Epigenomics: ChIP-seq, CUT&RUN, ATAC-seq, DNA methylation
- ❖ Variant discovery: WGS, resequencing, exome-seq and CNV
- ❖ Multiomics integration
- ❖ Spatial biology
- ❖ Experimental design and grant support

Training

- ❖ Hands-on workshops design to reflect best practices, reproducibility and an emphasis on experimental design

- ❖ Basic Data Skills

- ❖ Shell

- ❖ R

- ❖ Advanced Topics: Analysis of high-throughput sequencing data

- ❖ Chromatin Biology

- ❖ Bulk RNA-seq

- ❖ Differential Gene Expression

- ❖ scRNA-seq

- ❖ Variant Calling

- ❖ Current Topics in Bioinformatics

<https://bioinformatics.sph.harvard.edu/training>

Setting up to perform Bioinformatics analysis

Setting up...

- ❖ Introduction to the command-line interface (shell, Unix, Linux)
 - ❖ Dealing with large data files
 - ❖ Performing bioinformatics analysis
 - ❖ Using tools
 - ❖ Accessing and using compute clusters
- ❖ Introduction to R
 - ❖ Parsing and working with smaller BED files
 - ❖ Statistical analysis, e.g. differential binding analysis
 - ❖ Generating figures from complex data

Workshop scope

Bioinformatic Data Analysis

Figure adapted from Soon WW, Hariharan M, Snyder MP, "High throughput sequencing for biology and medicine". Molecular Systems Biology 9:640 2013

Genomic Methods for Profiling Chromatin

ChIP-seq

CUT&RUN

Figure 1. CUT&RUN schematic (see text for details).

ATAC-seq

Learning Objectives

- ❖ Describe important considerations for setting up a successful ChIP-seq, CUT&RUN or ATAC-seq experiment
- ❖ Describe the steps in a ChIP-seq analysis workflow (from sequence data to peak calls) and contrast any differences for CUT&RUN and ATAC-seq analyses
- ❖ Learn how to handle various file formats encountered when analyzing ChIP-seq and related data
- ❖ Implement shell scripts on a high-performance compute cluster to perform the above steps

The Workflow

The Workflow

Boxes in green represent parts of the workflow that will not be covered in this workshop

The Workflow

Logistics

Course schedule

Day 1

Time	Topic	Instructor
09:30 - 09:45	Workshop Introduction	Meeta
09:45 - 11:00	Studying epigenetic regulation using high-throughput sequencing data	Dr. Ming "Tommy" Tang
11:00- 11:05	Break	
11:05 - 11:20	HPC review Q&A	Will
11:20 - 11:50	Dataset overview and project organization	Will
11:50 - 12:00	Overview of self-learning materials and homework submission	Meeta

Before the next class:

I. Please **study the contents** and **work through all the code** within the following lessons:

1. [Experimental design considerations for HTS of chromatin](#)

[Click here for a preview of this lesson](#)

<https://tinyurl.com/hbc-chromatin>

Course materials

- ❖ We continuously update our materials to reflect changes in the field/software

Approximate time: 45 minutes

Learning Objectives

- Learn about quality control considerations when preparing your ChIP-seq experiment
- Understand the need for positive and negative controls

<https://tinyurl.com/hbc-chromatin>

Course participation

- ❖ Mandatory review of self-learning lessons and assignments
- ❖ Attendance required for all classes
- ❖ Your questions and active participation drive learning
- ❖ **We look forward to all of your questions!**

Course participation

- ❖ At-home lessons and exercises after each session
- ❖ Cover material not previously discussed
- ❖ Provides us feedback to help pace the course appropriately
- ❖ 3-5 hours to complete
- ❖ Homework load is heavier in the beginning of this workshop series and tapers off

Using AI for Assignments

❖ Do

- ❖ Try to resolve error messages with it
- ❖ Test code written by AI on a dataset where you have expected results
- ❖ Take the time to review the generated code line-by-line

❖ Don't

- ❖ Implement it in replacement to learning
- ❖ Write code that you don't understand
- ❖ Assume the output from an AI process is correct

Odds & Ends

- ❖ Quit/minimize all applications that are not required for class
- ❖ Name tags
- ❖ Post-its
 - ❖  green - I am all set
 - ❖  red - I need time/help
- ❖ Phones on vibrate/silent
- ❖ Bathrooms

Thanks!

- ❖ Kathleen Chappell and Andy Bergman from HMS-RC
- ❖ Data Carpentry
